Timesheet Management

Key Benefits

Work hours tracking is one of the most critical tasks for shift-based operations. Traditional manual processes are time-consuming and error-prone. Delays and mistakes impact the organization's bottom line and negatively affect employee morale.

Shiftboard's Timesheet simplifies your timesheet submission, validation, and approval process. With an easy and integrated online experience, you can:

Reduce Business Costs

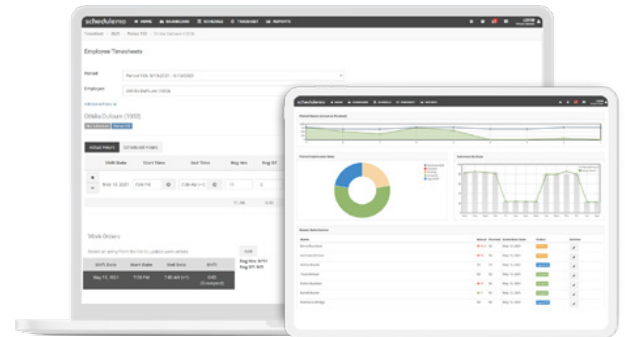

- Lower administrative costs from manual inefficiencies
- Lessen payroll errors due to hours submission and approval

Improve Employee Satisfaction

- Incentivize timely submissions with a simplified process
- Get employees paid accurately and on time

Drive Operational Excellence

- Unleash insights for better labor utilization planning
- Get accurate audits on work hours compliance issues

Capabilities

Integrated Scheduling and Time Tracking Experience

Shiftboard delivers a fully integrated platform to manage your end-to-end employee scheduling process. From schedule planning to day-of adjustments to time tracking, you can eliminate the hassle of reconciling data across multiple systems for payroll and seamlessly harvest labor utilization data for future planning.

- Plan, view, and track work hours with a single platform
- Update schedules and reports instantly upon timesheet approval
- Compare actual and planned hours in a seamless interface
- Audit time data for labor laws, union agreements, and policy violations

Matches Your Process and Data Requirements

Managing the varying data requirements and processes among business units is an essential and complex part of time tracking. Shiftboard is highly configurable to adhere to your policy needs.

- Creates timesheet submission periods, permissions, and reminders for multiple groups
- Enforces your timesheet submission, approval, and amendment workflows
- Applies your data requirements and pay code mapping through rich configurations
- Supports overtime banking, shift premiums, regular and OT hours splitting, and other scenarios
